

Understanding & Implementing AS9110 Rev. C

Course Description

This 2-day course delivers a thorough understanding of the AS9110 Rev. C Quality Management System Requirements for Aviation Maintenance Organizations, along with a review of key concepts and techniques for implementing the requirements within an organization.

Through a combination of presentation, discussion and hands-on exercises, participants will learn to apply the key concepts and principles of the standard to the existing processes within their organization.

Who Should Take It

Individuals with responsibility for management, operation, implementation or maintenance of an AS9110 Rev. C quality management system. This includes, but is not limited to:

- Those responsible for implementing their organization's QMS.
- Senior Management
- Quality Coordinators, Quality Managers & Management Representatives
- Members of the Quality Team and/or Internal Audit Team
- AS9110 Auditors, Quality Professionals and Consultants

Learning Objectives

- Understand Annex SL - the "Structured Layer" design of the standard (i.e. new numbering system for clauses that will be consistent across standards).
- In-depth understanding of the base ISO 9001:2015 quality management requirements, along with the specified additional requirements, definitions and notes for civil and military aviation maintenance and continuing airworthiness.
- Identify the general approach to implementing the AS9110 Rev. C requirements.
- Learn how to use the Gap Analysis as a tool to create an action plan for implementation.
- Build the confidence of QMS team members as you prepare your implementation project.

Prerequisites

This is an introductory course and no prerequisites are required.
