

Understanding & Implementing API Spec Q1

Course Description

Based on API Specification for Quality Programs for the Petroleum, Petrochemical and Natural Gas Industry, this course takes an informative look at the requirements, interpretations and practical applications to provide a good understanding of the quality management principles used throughout the oil and natural gas industry, as well as the actions and considerations required for the implementation of the API Q1 standard in an organization.

Learning Objectives

Through a combination of classroom discussion, group exercises and case studies, attendees will:

- Comprehend the major components of API Spec Q1.
- Understand the requirements of ISO 9001:2008.
- Compare and contrast ISO 9001:2008 to API Spec Q1.
- Thoroughly review the steps required to practically implement API Spec Q1 in an organization.

Who Should Attend

- Manufacturers of oilfield equipment
- Quality assurance personnel involved with specifying equipment requirements
- Quality systems auditors
- Anyone involved in the implementation of an API Q1 quality management system.

Prerequisite

This is an introductory course and no previous experience is required. Some working knowledge of ISO 9001 systems will be helpful.

Location

On-site

Duration

Two (2) Days

Cancellation Policy

An administration fee will be charged for cancellations less than 14 days prior to the course date. Substitutions will be permitted at any time. Course transfers may be made without penalty. The BRC reserves the right to cancel any seminar and will, in such event, fully refund all registration fees. No liability is assumed by the organizers for changes in seminar dates, content, speakers or venue.
