QMS Management

Quality Management

Quality Management Systems provide the organizational structure, policies, procedures, processes and resources required to manage the quality of your product/service and meet customer requirements.

ISO 9001 is by far the world's most established and utilized standard for quality management. It is currently under revision, with the new edition scheduled to be available by the 4th quarter of 2015.

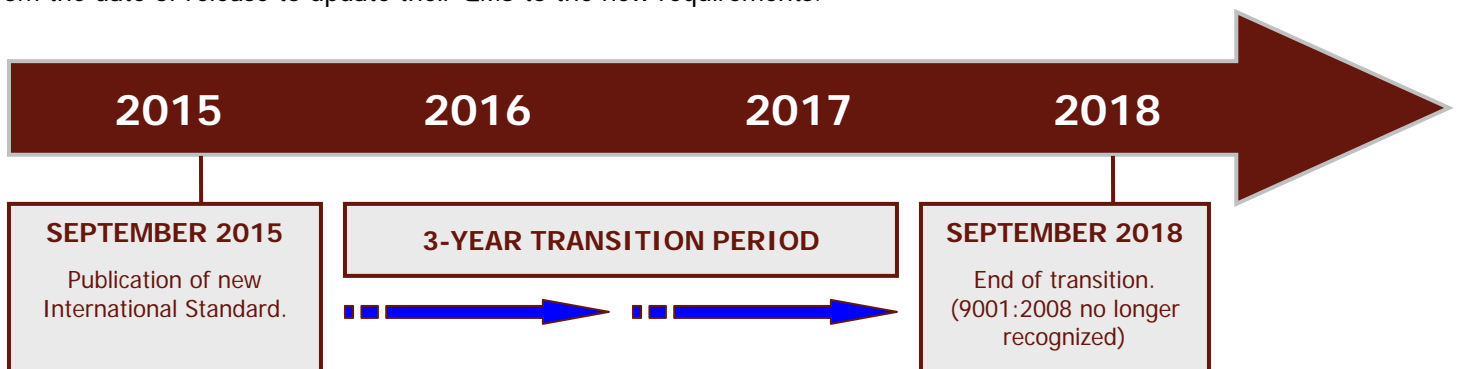

Transitioning to ISO 9001:2015

The ISO 9001 standard is updated every several years to ensure that your Quality Management System is helping you to stay relevant in the marketplace and continuing to offer you the best available practices.

Review this section for basic info on your timeline for transitioning and the steps you can take, including training courses available now. For more information and resources, visit www.thebrc.ca.

Transition Timeline

The ISO 9001:2015 international standard is due for final release in September 2015. Organizations have 3 full years from the date of release to update their QMS to the new requirements.

Steps to Take

Review the available BRC courses, including an *Understanding Requirements* for management, stakeholders and quality staff, as well as *Implementing Changes* for the key members of your transition team.

Consider on-site training...a cost -effective way to educate your entire team, define your transition project, and discuss the unique challenges and approaches required in your organization.

Request our ISO 9001:2015 Implementation Toolkit, a handy guide on steps to understanding, implementing and communicating the new requirements within your organization.

Consider The BRC for specialized services to assist with implementation. In addition to public and on-site training, we offer Gap Analysis audits, documentation revision/review, Internal Audits, consulting advice and more.

Understanding & Implementing ISO 9001:2015

2 Days of training that deliver a solid understanding of the new ISO 9001:2015 requirements **and** practical guidance on tools and approaches to update your QMS.

Duration: 2 Days

Cost: ~~\$1,050~~ \$950

CEUs: 1.6

Day 1 - Understanding Requirements of ISO 9001:2015

Learn the new standard through immersive hands-on exercises and discussion.

Day 2 - Implementing of Changes to ISO 9001:2015

Review approaches and techniques for implementing the key changes (risk-based thinking, documented information, leadership, etc.).

Sep. 24 - 25	Edmonton, AB	Nov. 5 - 6	Ottawa, ON	Dec. 3 - 4	Saskatoon, SK
Sep. 24 - 25	Calgary, AB	Nov. 19 - 20	Vancouver, BC	Dec. 3 - 4	Edmonton, AB
Sep. 28 - 29	Mississauga, ON	Nov. 19 - 20	Winnipeg, MB	Dec. 3 - 4	Calgary, AB

Environmental Management

Environmental Management Systems are used by many companies in different industries to identify and manage environmental risks, to demonstrate a commitment to the environment, and many times to enhance their corporate reputation. In some industries, large organizations are expecting their suppliers to demonstrate environmental responsibility, and even to maintain a compliant or certified EMS as a condition of doing business.

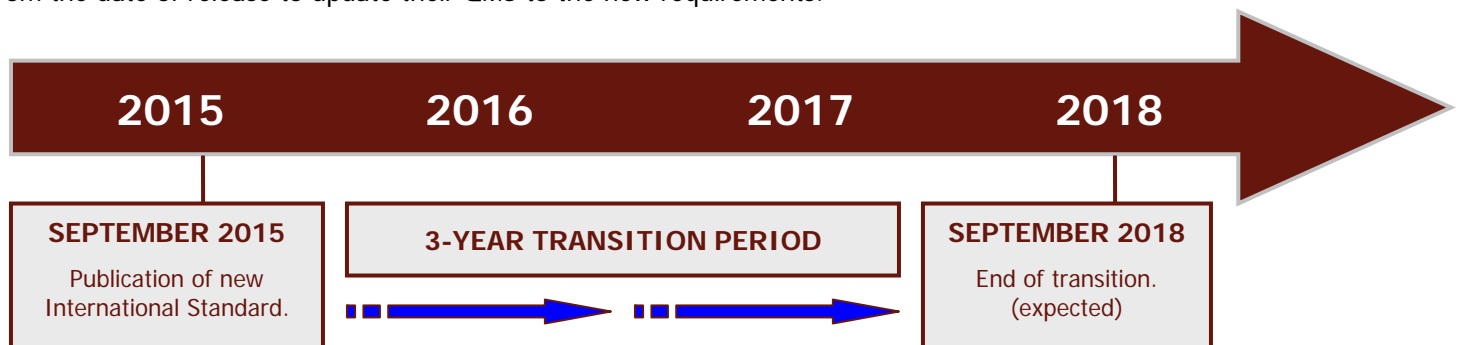

Transitioning to ISO 14001:2015

The ISO 14001 standard is updated every several years to ensure that your Environmental Management System reflects current issues, best practices, and technologies.

Review this section for basic info on your timeline for transitioning and the steps you can take, including training courses available now. For more information and resources, visit www.thebrc.ca.

Transition Timeline

The ISO 9001:2015 international standard is due for final release in September 2015. Organizations have 3 full years from the date of release to update their QMS to the new requirements.

Steps to Take

Review the available BRC courses, including our *Understanding & Transitioning to ISO 1401:2015* course, a 2-day course offering critical knowledge for leadership, management, and transition team members.

Consider on-site training...a cost-effective way to educate your entire team, define your transition project, and discuss the unique challenges and approaches required in your organization.

Visit our website for more resources, including blog posts, articles, reference material and more. All of these tools are complimentary and will help you to plan, implement and communicate the new requirements.

Consider The BRC for specialized services to assist with implementation. In addition to public and on-site training, we offer Gap Analysis audits, documentation revision/review, Internal Audits, consulting advice and more.

Understanding & Transitioning to ISO 14001:2015

An in-depth study of the new ISO 14001:2015 standard for Environmental Management Systems. Learn the new requirements through hands-on exercises and class discussion, and review approaches to implementing the key changes. Critical knowledge for leadership, management and team members who need to understand the new requirements of ISO 14001:2015.

Auditing & Quality Skills

The support, maintenance and continual improvement of quality (and quality management systems) requires a specialized set of skills. Auditing. Problem Solving. Process Improvement. The list is long and can be expanded even further to include many other skill sets and disciplines (manufacturing skills, statistics and measurements, etc.).

Learn more about the different ways you can enhance your team's skills in Auditing, Root Cause Analysis, Process Mapping, and other core disciplines that every organization needs and uses...

Advanced Auditing Skills

This in-depth auditing course for experienced auditors quickly refreshes the fundamental auditing skills and goes on to cover the knowledge required to lead an audit team. Topics include planning an audit program, selecting/managing an audit team, conducting opening and closing meetings, preparing audit reports and findings, and effectively identifying opportunities for improvement.

Duration: 2 Days
Cost: \$995
CEUs: 1.6

Manufacturing Services

Manufacturing is a broad industry, but across different markets manufacturers face many of the same Quality requirements, expectations, and challenges. The BRC offers public and on-site training to help companies with a variety of production related topics, including Risk Management (FMEA, etc.), Process Improvement, Core Tools, Design of Experiments, Total Productive Maintenance and GD&T.

FMEA (Failure Mode & Effects Analysis)

Detailed instruction on FMEA, a team-based risk management technique that recognizes and evaluates the potential failure of a product or process and identifies actions that could eliminate or reduce the chance of the failure occurring. Participants will acquire the knowledge and skills necessary to understand and interpret the FMEA 4th Edition guideline requirements and to develop and implement FMEAs within their company's automotive manufacturing operations.

Duration: 2 Days

Cost: \$995
