

## CSA Z1000-14 Internal Auditor

---

### Course Description

This CSA Z1000-14 Internal Auditor course has been developed to provide participants with a detailed understanding of the requirements of the CSA Z1000-14 standard, along with the required knowledge and skills that will enable them to plan, perform and document internal audits.

Canada's National Standard for occupational health and safety management, the Z1000 standard sets out the framework for an occupational health and safety management system (OHSMS) and follows the Plan-Do-Check-Act model that facilitates integration with the other management systems embraced by progressive organizations (e.g. ISO 14001, ISO 9001, etc.)

Developed with the participation of organized labour, management and government representatives, Z1000-14 is designed to help organizations improve their occupational health & safety performance, with the intent of preventing workplace injuries, illnesses and fatalities.

### Who Should Take It

Any of those responsible for or involved in the set up, auditing and maintenance for the requirements of the health and safety program for their company.

### Learning Objectives

- Acquire knowledge of the requirements of the CSA Z1000-14 standard.
- Learn the importance of setting up the standard to ensure conformity with existing OHS policy and how this standard relates to other health and safety standards (e.g. OHSAS 18001).
- Appreciate the roles and responsibilities of the Auditor.
- Apply the concepts and guidelines detailed in ISO 19011:2018 when performing an audit.
- Practice all phases of an internal audit including creating checklists, evaluating evidence and writing reports.
- Develop the necessary communication skills, leadership skills and attitudes to perform an internal audit.

### Prerequisites

There is no required prerequisite, though previous experience with the CSA Z1000-14 standard and/or occupational health & safety procedures and processes would be helpful.

### Location

On-Site

### Duration

Two (2) Days

**CEUs (Continuing Education Units):**

1.6

**BCRSP CM (Certification Maintenance) Points:**

This course contains 16 technical hours and is eligible for 1.3 BCRSP CM Points using the criteria described at [www.bcrsp.ca](http://www.bcrsp.ca).
