

ISO 9001:2015 and Risk-Based Thinking

Course Description

This course explores the requirements of ISO 9001:2015 related to "Risk-Based Thinking" and identifies tools and techniques that can be used to implement Risk-Based Thinking within your ISO 9001:2015 Quality Management System.

Participants will learn how to identify, classify and quantify risks, as well as how to integrate and document this approach within a Quality Management System in a straightforward manner.

Who Should Take It

Those individuals within the organization who are responsible for its ISO 9001:2015 QMS, including:

- Quality Managers
- Those working with an ISO 9001 QMS who will be involved with updates to new requirements.
- Those with roles and responsibilities related to risk.
- Members of the Quality Team and Internal Audit Team.

Learning Objectives

Through a combination of presentation, discussion and group exercises, participants will:

- Identify the different risk-related requirements within ISO 9001:2015.
- Understand different methods for identifying, classifying and quantifying risks.
- Learn how to apply "Risk-Based Thinking" to implement effective process controls.
- Understand how to document risk-related activities within a Quality Management System.

Prerequisites

Participants are required to have previous training in the general requirements of ISO 9001:2015 (e.g. The BRC's "Understanding & Implementing ISO 9001:2015" course).
